

# Technical Data Sheet

**Product:**

**Xlure HHB**

**Code:**

**CAT-HHB-KIT/REFFILL**

## Description:

The Xlure HHB is a multi-species trap for use in areas containing protein and meats. It targets the red legged ham beetle (also known as copra beetle), *Necrobia rufipes* and the hide beetle, *Dermestes maculatus*. It works by luring the beetle into the pitfall trap with the effect of an attractant.

**Active ingredient:** Food attractants for the red legged ham beetle, *Necrobia rufipes* and the hide beetle, *Dermestes maculatus*.

**Inert ingredient:** Non-drying insect adhesive

**Longevity:** 6 - 8 weeks

**Packaging:** Box of 10

## Application:

**Trap Spacing:** 8-10m

**Where to use:** Curing houses, pet food storage, retail and distribution centres, cheese production facilities, premises dealing with dried meats, bone meal, dried salt and fish, museums and anywhere where skin or protein products are stored or displayed.

**Trap application:**

Peel off the aluminium foil from the cartridge to the main body of the trap. Place the trap on the floor in areas susceptible to infestation. Monitor the trap 2-3 times a week and once full of insects, change the cartridge.

## Storage:

Store in a cool, dry place out of direct sunlight. To enable a longer shelf life, the Xlure HHB should be stored at the below temperatures:

6 Months: 10-20 °c

12 Months: 4-10 °c

24 Months: 0-4 °c

36 Months: -18 °c

## Precautions:

- Handle carefully, avoid extensive contact by hand.
- Do not smoke around this product. Nicotine will reduce its effectiveness.
