

Technical Data Sheet

Product

Xlure RTU Inspector

Code

CAT-XLINP-IMM/CB

Description

This compact, discreet and prebaited trap is designed to release a lower level of pheromones so that a large number can be placed over a small area without interference between traps.

Active Ingredient: Z, E tetradecadienyl acetate

Inert Ingredients: UV Filter, Antioxidant

Application

Open the aluminium foil bag and remove the inspector trap. Pinch the sides together and fold the trap open as above. Traps can be stuck to vertical or horizontal surfaces as needed. Examine the trap at least once a week and collect data. During an infestation more frequent reading may be needed.

Replace the pheromone trap every 4-6 weeks or as recommended by a Professional Pest controller. Remove the old trap and dispose of away from the monitoring area.

Storage

6 months: 10-20°C

12 months: 4-10°C

24 months: 0-4°C

Precautions

Handle carefully, avoid extensive contact by hand.
